Animal ID Number: _____

Animal Irradiation Scoring Sheet

Building /Room _____ / _____ protocol#: _____

IRRADIATION SCORING TABLE		
Clinical Sign	Score	Symptoms description
Body loss	0	No Body loss/BCS 3 to 2
	1	Weight loss up to 20% BW/BCS 2; signs of recovery within 2 weeks post-irradiation
	2	Weight loss up to 25% BW/BCS 2; without signs of recovery within week 3 post-irradiation or BCS 1
Anemia	0	Absent
	1	Mild anemia without other relevant signs – mild paleness of mucous membranes.
	2	Persistent Anemia/associated with bleeding GI tract - paleness of limbs, tail, and ear pads.
Intestinal Bleeding	0	Absent
	1	Mild to moderate without general signs of anemia – normal mucous membranes, no paleness.
	2	Persistent anemia associated with bleeding GI tract – paleness of limbs, tail and era pads, anal bleeding/bloody stools.
Infection	0	Absent
	1	Mild signs of infection without impairment of the animal capacity to move and access food and water autonomously – mild skin infection, mild ocular or nasal discharge without impairment of visual and breathing capacity.
	2	General signs of infections with impairment of the animal capacity to move and access food and water autonomously – severe skin infection, severe ocular discharge with eyelids close, nasal discharge with impairment of respiratory frequency, enteritis and dehydration, vestibular syndrome.
Teeth issues	0	Absent
	1	Mild to moderate incisors lesions without impairment of the animal capacity to access food and eat autonomously
	2	Severe incisors lesions with impairment of the animal capacity to access food and eat autonomously – weight loss.
Graying of hair coat	0	Absent/Present without signs of skin ulcers
	1	Mild skin damage – mild dermatitis/ulcers without bleeding
	2	Severe skin damage – ulcers that do not recover, evident bleeding.
