I affirm that the collaboration described above, which may include the sharing of human biological samples or human study data, falls within the scope of the research proposal and informed consent approved by the corroborating Local Ethics Committee. I understand that each Local Ethics Committee assumes full responsibility for providing post-approval monitoring of the activities occurring at their respective institutions, including but not limited to monitoring:

- the informed consent process,
- study conduct,
- de-identification of samples/data (if required),
- storage of data or samples.

I understand that each institution will be responsible for reporting adverse events or non-compliance to their respective regulatory agencies and will notify each other of events that may impact the research collaboration.
